ARTIST BIO:

“Jason Heeter offers up a powerful Americana and Roots Rock sound that’s complemented by a smoky smooth voice and a tight ensemble. You can catch him in a number of ensembles including Missourado and Heet & the AC’s, and you can always expect heartfelt original music and soulful renditions of classic favorites. An accomplished singer-songwriter and musician, Heeter has performed across the United States gracing the stages of the Shipyard Music Festival, MoRoots Music Festival, Music for the Mind Festival, and sharing the stage with such artists as Maggie Rose, Jennifer Hartswick, Big Something, and more!

After releasing the collaboration album “Deuce & Heeter – The '79 Sessions”, and the solo EP "Staring at the Sun", Heeter is back in the studio with the AC’s working on a new self titled album. With extensive experience, and influences ranging from JJ Cale, to Jason Isbell; from Bill Withers, to the Grateful Dead, the stylistic variety of his catalog further confirms his natural talent. Sometimes its funky, sometimes its folky, but one thing is certain. It’s always a good time!
